## The United States Naval Nuclear Propulsion Program

---

By Department of the Navy

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 86 pages. Dimensions: 11.0in. x 8.5in. x 0.2in. A strong Navy is crucial to the security of the United States, a nation with worldwide interests which conducts the vast majority of its trade via transoceanic shipment. Navy warships are deployed around the world every hour of every day to provide a credible forward presence, ready to respond on the scene wherever Americas interests are threatened. Nuclear propulsion plays an essential role in this, providing the mobility, flexibility, and endurance that todays smaller Navy requires to meet a growing number of missions. About 45 percent of the Navys major combatants are nuclear-powered: 11 aircraft carriers, 53 attack submarines, and 18 strategic submarines (the Nations most survivable deterrent) 4 of which were removed from strategic service and converted to a covert, high-volume, precision strike platform designated as SSGN. The mission of the Naval Nuclear Propulsion Program, also known as Naval Reactors, is to provide militarily effective nuclear propulsion plants and ensure their safe, reliable, and long-lived operation. This mission requires the combination of fully trained U. S. Navy men and women with ships that excel in endurance, stealth, speed, and...
