*A brand new electronic book with a new standpoint. It is written in basic phrases rather than confusing. It has been designed in an extremely basic way which is merely right after I finished reading through this publication where it basically altered me, change the way I believe.*

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *Experimental Pedagogy and the Psychology of the Child* This new edition differs from preceding editions by many alterations: the Historical Sketch is included for the first time, Chapters II., III., and V. have been completed and more or less remodelled; on the other hand, the chapter on Mental Development has been but little changed. The volume as a whole has been increased by nearly 200 pages, and the authors quoted now number 630 as against 250. In some of the reviews of this work, regret has been expressed that it did not contain more practical advice for the pedagogue. But my aim in writing the book was not to compile a manual of pedagogy; I simply wished to introduce the educator to psychological science, and particularly to the psychology of the child. The first steps taken in learning a new science are always tiresome and difficult: time is lost in finding one's bearings, in understanding what exactly is the aim of the science, in discovering the problems which it tries to solve; therefore a guide is often very valuable. To be such a guide is the function of this book, at least a guide to the study of those problems which are here treated.
