

Battleships: Issues Arising from the Explosion Aboard the U.S.S. Iowa: T-Nsiad-91-2

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO discussed the explosion aboard the U. S. S. Iowa, focusing on: (1) an independent investigation of the Navys technical analysis of the explosion; (2) equipment serviceability and safety; (3) manning and training issues; and (4) the battleships employment plans and mission. GAO found that: (1) the Department of Energys Sandia National Laboratory concluded that there was a plausible alternative scenario to the Navys finding of an intentional act; (2) as a result of Sandias findings, the Navy halted all firings of the 16-inch guns and initiated further testing; (3) the Navy and Sandia believed that the ban could be lifted by using a different propellant configuration and taking different management actions; (4) Sandia could not confirm or deny the Navy conclusion that foreign material residue found in the gun was evidence of a chemically activated detonator device; (5) the Navys need to maintain two battleships was questionable; (6) there was no pattern of failures that indicated systematic problems with the guns and other turret equipment; (7) injury reports revealed no prior safety problems that could be related to the explosion;...

Reviews

This book might be worthy of a go through, and a lot better than other. it had been writtern really properly and helpful. You may like just how the author write this publication.

-- **Prof. Mattie Beatty**

Thorough guide! Its such a very good go through. It is really simplified but surprises in the 50 % from the ebook. You will like how the blogger write this ebook.
